

If Apps on the iPads are not downloading Properly please follow the steps below:

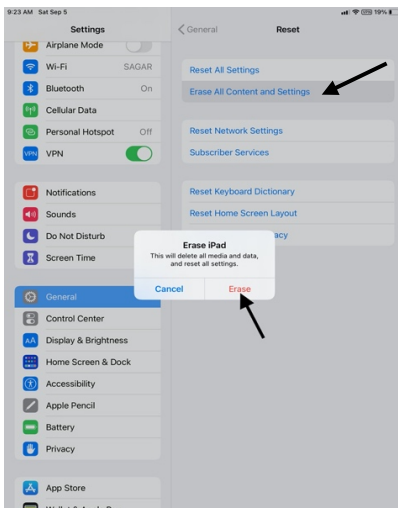

1.Navigate to Setting:

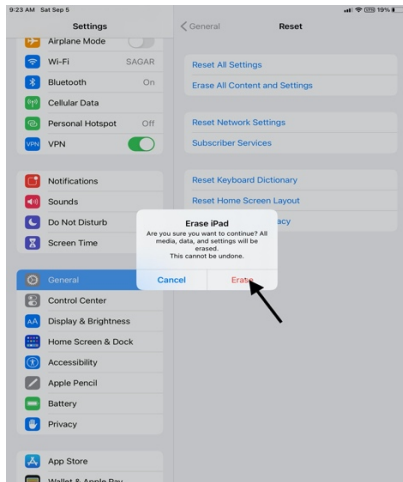

2.Click on General then select Reset:

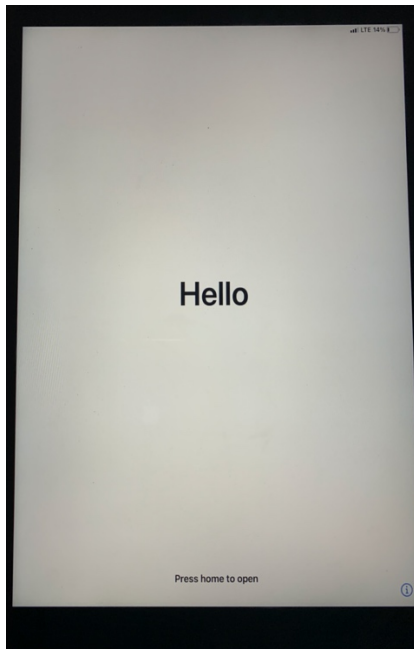

3.Click on Reset all content and Setting then click on Erase:

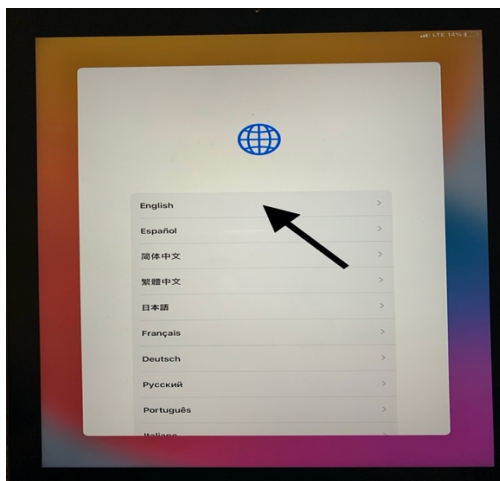

4.Click on Erase one more time:

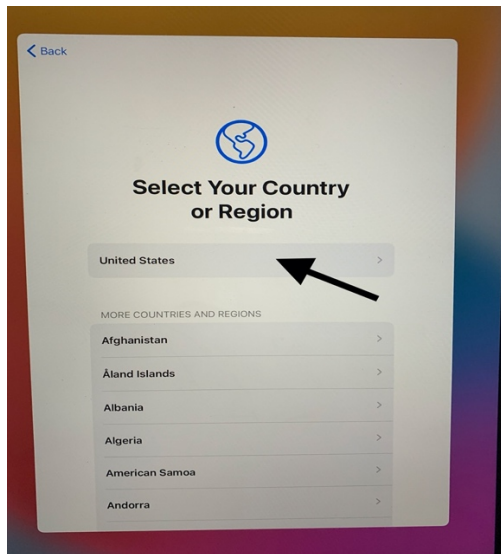

5. iPad will restart, and you see the Apple logo with the loading Bar for about 1-2 minutes then when you see Hello on the screen follow the step below to setup your iPad:

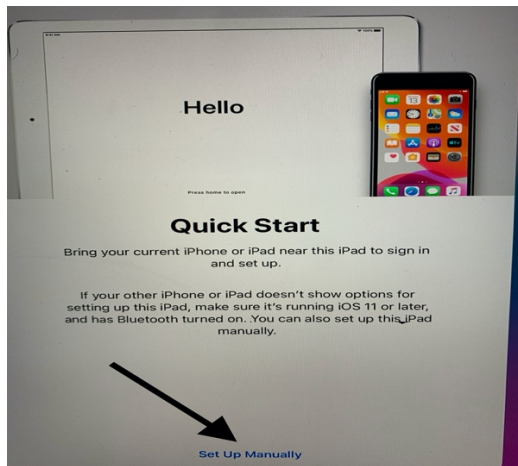

1. Select the Language: English

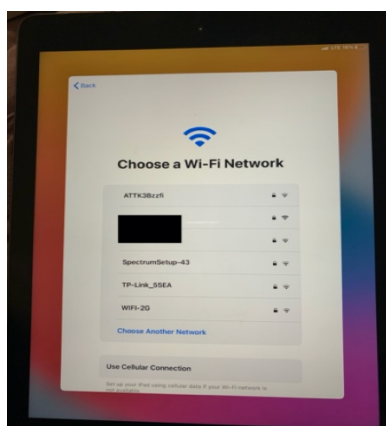

2. Select the Country or Region: United States

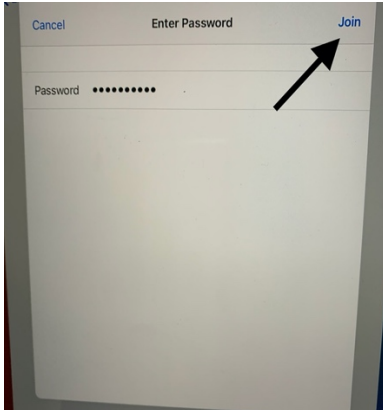

3. Select the setup Manually:

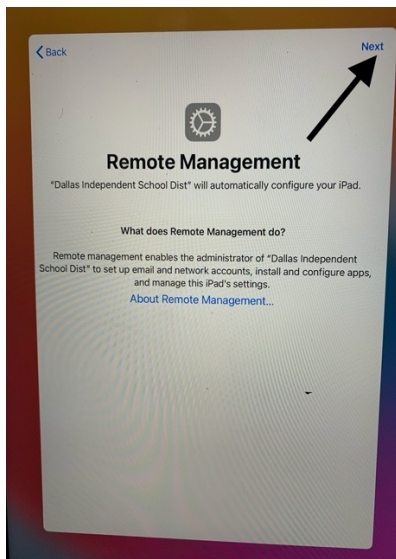

4. Connect it to your WiFi and type your password then click on join:

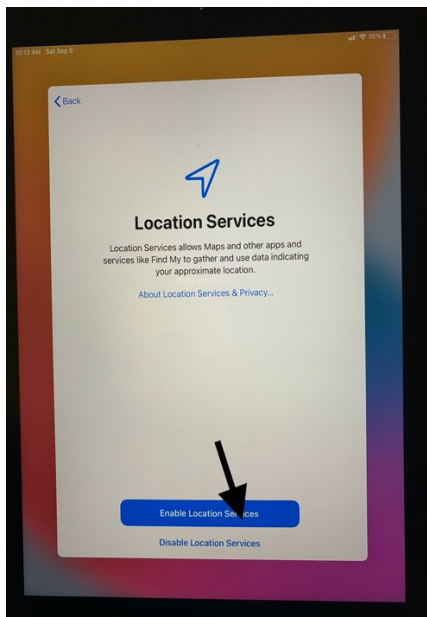

5. You will see the Remote Management Page then click Next:

6. On Location Services click on Enable Location:

**7.Important:** Please Wait about 20 Minutes until you see All apps loading Successfully
