Updated Evaluation of Kindergarten to Grade 2: 2015-16

Myoungsook Kim, Ph.D.

At-a-Glance

Istation provided recalibrated Istation’s Indicators of Progress data for the fall 2015 English administration in January 2017. As a result, relevant text, tables, and figures were updated.

The goal of the K-2 Curriculum and Instruction Department is to ensure that all students are reading on grade level by the end of second grade. The budget for the department in 2015-16 was $3,109,616, which included $2,393,849 of general operating funds and $715,767 of Title I, Part A funds. The purpose of this report was to assess a) whether students were achieving at or above grade level on reading and mathematics based on TerraNova, SUPERA, and Istation’s Indicators of Progress (ISIP); b) what percentage of kindergarten (K) students who attended district prekindergarten (PK) in 2014-15 were K ready in fall 2015; and c) whether attending the district’s PK program made a difference in the reading and mathematics performance of the students.

Student Outcomes on TerraNova

For reading in 2015-16, 80 percent of the K students performed at or above grade level, as did 67 percent in grade one and 62 percent in grade two (see Figure 1). Thus, a sizable percentage of students in grades one (33%) and two (38%) performed below grade level in reading. For mathematics, 60 percent of the K students performed at or above grade level, as did 53 percent in grade one and 58 percent in grade two. Like reading, a sizable percentage of students in grades K through two (40% to 47%) performed below grade level in mathematics.

53%
58%

Student Outcomes on SUPERA

In 2015-16, the percentage of students at or above grade level was much higher for K and first-grade students than for second-grade students (88% for both K and grade one versus 44% for grade two). Thus, a sizable percentage of second-grade students (56%) performed below grade level in 2015-16.

Differences in Kindergarten Readiness by Prekindergarten Enrollment Status (Updated with Fall 2015 ISIP Recalibrated Data)

There were 8,974 kindergarten students that took ISIP in September of 2015 that were previously eligible to receive Dallas ISD PK. About 51 percent of these students were kindergarten ready (scored at or above grade level; Table 1). A higher percentage of students who were previously enrolled in Dallas ISD PK (DISD PK; 60.7%) were kindergarten ready than students who were eligible but did not attend Dallas ISD PK (No DISD PK; 28.5%).

Source: PEIMS district database: 10/30/2015; ISIP: 1/31/17.

Note: Beginning-of-Year ISIP results were used. *Istation provided recalibrated data for the fall 2015 English administration in January 2017. If a student completed the assessment in both languages, departmental guidelines were used to determine which assessment to include in the combined dataset. If a student took the test more than once, the latest score was used.

Student Outcomes on ISIP (Updated with Fall 2015 ISIP Recalibrated Data)

More students that tested in Spanish performed at or above grade level in reading than those that tested in English. For the English and Spanish administrations combined, the overall percentage of students at or above grade level in 2015-16 ranged from 52 percent to 59 percent (52% to 59% for K, 53% to 59% for grade one, and 56% to 58% for grade two). Results showed small positive changes from the beginning to the middle

4 To allow for accurate comparison between DISD PK and No DISD PK groups, only those kindergarten students who met the PK eligibility requirements were included in this sample.
to the end of the 2015-16 school year for grades K and one. However, there was no pattern of progress for grade two. The percentages of students at or above grade level were higher in 2015-16 than in 2014-15 for all grades (see Figure 2).

Figure 2: Percentage of Students in Grades K to 2 Performing At or Above Grade Level on ISIP

Differences in Achievement Scores by Prekindergarten Enrollment Status

For all comparisons between the 2013-14 DISD PK and No DISD PK cohort group on various reading and mathematics assessments (ITBS/Iowa/TerraNova, Logramos/SUPERA, and ISIP), the DISD PK group outperformed the No DISD PK group. That is, at all grades, more cohort students who attended district PK were at or above grade level in reading and mathematics than cohort students who did not attend district PK (see Figures 3 to 5). The PK program has changed substantially since 2013-14, so this should serve as baseline data.

5 To examine the long-term impact of the district PK program, in addition to the ISIP, TerraNova, and SUPERA data, Iowa Tests of Basic Skills (ITBS) data in 2013-14, Iowa Assessments (Iowa) data in 2014-15, and Logramos data in 2013-14 and 2014-15 were used for the 2013-14 K cohort students.

</table>

Note. ITBS Mathematics Total without Computation results were used for K, while Iowa/TerraNova Mathematics results were used for grades one and two.

**Recommendations**

Recommendations were to (1) continue the district focus on increasing access to PK and improving PK quality, and (2) continue to focus on early language and literacy development and to align birth to five and K to two efforts.
