The Texas Common Course Numbering System (TCCNS) is a voluntary, co-operative effort among 136 Texas community colleges and universities to facilitate transfer of freshman and sophomore level general academic coursework. TCCNS provides a shared, uniform set of course designations for students and their advisors to use in determining both course equivalency and degree applicability of transfer credit on a statewide basis. When students transfer between two participating TCCNS institutions, a course taken at the sending institution transfers as the course carrying the same TCCNS designation at the receiving institution. The Dallas Independent School District (DISD) has an Interlocal Agreement with the Dallas County Community College District (DCCCD), which is a participating TCCNS institution. Below are a few websites to assist you in identifying high school to community college to university course equivalency.
